Hardigg

A Proud Partner of t

For over half a century, Hardigg engineers have proudly developed custom solutions for the transport and packaging needs of the US Military. Our innovative products enable sensitive equipment to travel through hostile environments and arrive operational. Many of our models have been combat tested, including over 30,000 M16 cases in the field today. By developing custom solutions, testing new materials and continuously improving designs based on user feedback, we have been able to build this robust line of weapon cases that proudly live up to the harsh demands of conflict as well as peacetime. We look forward to solving your toughest shipping issues and seriously encourage your requests for specific need cases. After all, in the field, top notch performance matters most to both of us.

The Highest Level of Confidence in the Field

Airtight, watertight and tough, Hardigg cases keep weapons safe from moisture, sand, dust, salt and even impact. Lightweight, polyethylene rotomolding with reinforced corners to minimize drop damage while creating a solid,

yet lightweight, shield from the outside world. Rib designed outsides maximize stacking and stability enroute while inside every weapon remains secure in fitted foam. Quite simply, no other cases are better prepared to protect your critical gear under harsh conditions than a Hardigg.

- Impact Protected Corners- Rotomolding Builds Up Thickness
